

2 Graphical User Interfaces (cont.)

BK Chap. 11.

Overview

- GUI layout
- Nested containers
- Borders
- Spacing
- Dialogues
- ImageViewer ver. 2.0, 3.0, 3.05, 3.1

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 2

Layout managers

- Manage limited space for competing components.
 - FlowLayout, BorderLayout, GridLayout, BoxLayout, GridBagLayout.
- Manage Container objects, e.g. a content pane.
- Each imposes its own style.

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 3

FlowLayout

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 4

BorderLayout

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 5

GridLayout

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 6

BoxLayout

Note: no component resizing.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 7

Nested containers

- Sophisticated layouts can be obtained by nesting containers.
 - Use `JPanel` as a basic container.
- Each container will have its own layout manager.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 8

AWT Components and Containers

- Components have graphical representation
- Containers have components
- Containers are components

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 9

Swing Components and Containers

- Use `JPanel` as container for Swing components

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 10

Buttons and nested layouts

A GridLayout inside a FlowLayout inside a BorderLayout.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 11

Borders

- Used to add decoration around components.
- Defined in `javax.swing.border`
 - `BevelBorder`, `CompoundBorder`, `EmptyBorder`, `EtchedBorder`, `TitledBorder`.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 12

Adding spacing

```
JPanel contentPane = (JPanel) frame.getContentPane();
contentPane.setBorder(new EmptyBorder(6, 6, 6, 6));

// Specify the layout manager with nice spacing
contentPane.setLayout(new BorderLayout(6, 6));

imagePanel = new ImagePanel();
imagePanel.setBorder(new EtchedBorder());
contentPane.add(imagePanel, BorderLayout.CENTER);
```

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 13

Struts and Glue

- Invisible components used as spacing.
- Available from the `Box` class.
- Strut: fixed size.
 - `Component createHorizontalStrut(int width)`
 - `Component createVerticalStrut(int height)`
- Glue: fills available space.
 - `Component createHorizontalGlue()`
 - `Component createVerticalGlue()`

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 14

Other components

- Slider
- Spinner
- Tabbed pane
- Scroll pane

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 15

Dialogs

- Modal dialogs block all other interaction.
 - Forces a response from the user.
- Non-modal dialogs allow other interaction.
 - This is sometimes desirable.
 - May be difficult to avoid inconsistencies.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 16

JOptionPane standard dialogs

- Message dialog
 - Message text plus an OK button.
- Confirm dialog
 - Yes, No, Cancel options.
- Input dialog
 - Message text and an input field.
- Variations are possible.

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 17

A message dialog

```
private void showAbout()
{
    JOptionPane.showMessageDialog(frame,
        "ImageViewer\n" + VERSION,
        "About ImageViewer",
        JOptionPane.INFORMATION_MESSAGE);
}
```

Objektorienterade applikationer, DAT055, DA12, 11/12, lp 3

Nr 5 18

Image filters

- Functions applied to the whole image.

```
int height = getHeight();
int width = getWidth();
for(int y = 0; y < height; y++) {
    for(int x = 0; x < width; x++) {
        Color pixel = getPixel(x, y);
        alter the pixel's color value;
        setPixel(x, y, pixel);
    }
}
```

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 19

Adding further filters

```
private void makeLighter()
{
    if(currentImage != null) {
        currentImage.lighter();
        frame.repaint();
        showStatus("Applied: lighter");
    }
    else {
        showStatus("No image loaded.");
    }
}
```

```
private void threshold()
{
    if(currentImage != null) {
        currentImage.threshold();
        frame.repaint();
        showStatus("Applied: threshold");
    }
    else {
        showStatus("No image loaded.");
    }
}
```

Code duplication?
Refactor!

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 20

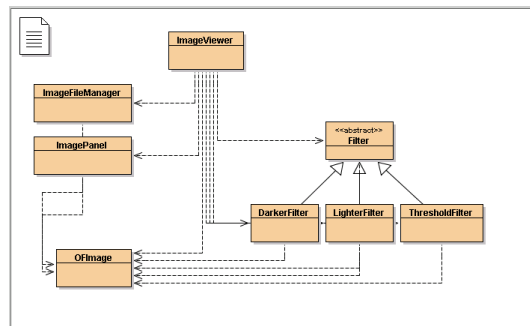

Adding further filters

- Define a *Filter* superclass (abstract).
- Create function-specific subclasses.
- Create a collection of subclass instances in *ImageViewer*.
- Define a generic *applyFilter* method.
- See *imageviewer2-0*.

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 21

imageviewer2-0

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 22

Review

- Aim for cohesive application structures.
 - Endeavor to keep GUI elements separate from application functionality.
- Pre-defined components simplify creation of sophisticated GUIs.
- Layout managers handle component juxtaposition.
 - Nest containers for further control.

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3

Nr 5 23

Review

- Many components recognize user interactions with them.
- Reactive components deliver events to listeners.
- Anonymous inner classes are commonly used to implement listeners.

Objektorienterade applikationer, DAT055, DAIZ, 11/12, lp 3
